## Film Fix

Acronym FilmFix combines four different filters of Adobe Premiere Pro and After Effects to perform restoration tasks that are generally only achievable by skilled professionals. This plugin is suited for pixel-based footage, such as video-resolution footage transferred from film. More than 95% of the tasks are fully automatic. Meaning that you only have to click the Automate button to let the plugin perform the entire processing. Quick Review: Restore: The plugin can restore shaken frames, stabilize shaky footage, remove tears, and also cut out noise and dust particles from footage. The Automate button makes it easy to process even the largest amounts of footage in an automated manner. Clone: Clone frames from one clip into another. This allows you to copy the frames of one clip to another, thus copying the look of the original to the clone. Crop: Cut out any areas from a clip. This can be used to crop clips to a specific size, such as headshots for newsletters. Apply: Apply filters for special effects (such as distortions) to a clip. Combine: Combine multiple clips. Unite: Unite two clips together in one clip. Crop: Cut out any areas from a clip. This can be used to crop clips to a specific size, such as headshots for newsletters.
