First, I had to pay \$100 for an iMac (which I'm not paying any more) and second, I managed to delete any data when I upgraded. I have a school project I need to work on and every time I access Word it crashes. Then I remember that this happened after I upgraded. If I could just get the old data back I'd be ok, but as long as I have to re-install everything I don't feel like I'm getting my money's worth. I have a new 20GB iMac with OS X Lion (I have Snow Leopard). If I upgrade to Lion without the additional 20GB hard drive, can I keep some of my files/apps on my old hard drive and run them on the new iMac? If so, how? I have a 32GB flash drive that I will use for backup. Is there any reason why I should not do this? A: There is a tech note on Lion's site about migrating your existing user accounts. First backup your data, then follow the instructions. If your data is large, use Time Machine. If you have only updated to Lion, then you will have to delete and re-install all of your applications and files. The best way to do that is to use Migration Assistant. If you find that you have old files that you have lost, you can copy and paste (mv) them to a location that will be backed up, and you can re-install them from that location when the time comes. (for example, your desktop's ~/Desktop folder) You can create a new user account and use Migration Assistant to try it out with a fresh install. Be careful! A: I've had this error before and it's pretty simple. Go to the Applications folder and delete the Programs folder. It should be just Applications in the Finder. You might need to reboot after doing this. Sw

I am always trying to find ways to simplify the lives of my fellow techies by looking for applications that can help make things easier, and in the process of doing that I came across this wonderful program. About Me: I am Rick, I am a technologist with a 20 year background as a coder and penetration tester. I am passionate about technology and all it's wondrous aspects. The whole area of technology has so many amazing, breathtaking and fascinating tools and applications. I am continually amazed at how fast technology is changing. I love to create applications and applications that are both simple and elegant. I don't like cluttered, busy, overly complicated and unproductive solutions. I am all about the efficient, yet thoughtful and fun solution. I am an avid reader and can't be without a book. My favourite genres are fantasy, sci fi, detective fiction, magic, mystery and history. Occasionally I stray into other genres as I am not a big fan of sci fi or fantasy when they are weighed against history. I am a big fan of fantasy and sci fi games and books. Me and my colleagues enjoy drinking beer and chatting with friends and colleagues. Hobbies & Interests: My hobby of choice is ironing. I also enjoy playing games, collecting junk, scuba diving, aerobatics, watching movies and reading books. I'm also a big fan of exercise and fitness. I exercise regularly to keep in shape, prevent illness, and to enjoy life. Reviews I found this useful and I believe that it may be the little things that make all the difference. I have struggled with many a situation where the default delete option would not work until I found this program. As soon as I used it the problem was solved. The program is very simple to use and does exactly what it is supposed to. It is very easy to understand. I like the fact that it is very lightweight. There is nothing clunky about it. It is simple to use and has a good interface. When you finish using it you will not want to delete it. I like the fact that it is very simplistic and that there is a "don't delete" option.
